Maxim Elchaninov

Interface and game design

Saint Petersburg · slcrmmbr@outlook.com · t.me/silenceremember · silenceremember.github.io
ORCID 0009-0000-0383-7357

Open to remote work: part-time or project-based

ABOUT

I design interfaces for websites and games: UX audits and user flows, Figma layouts, game UI. I build prototypes and tools with AI to test an idea before it goes to development; Gridsnap and my portfolio site silenceremember.github.io were built that way.

Master of game design and PhD student at ETU “LETI”, researching software documentation tools. I write concept documents and technical specifications for the team.

CASES

UX audit of the LETI admissions website · Capybara Bunk multiplayer UI · Gridsnap for Unity (Asset Store) · Architecture Rendering game. Details: silenceremember.github.io/projects.html

EXPERIENCE

Feb 2024 – Apr 2025	**R&D Team Lead (game design and development)**, 2IQLabs, student R&D group at RANEPA Built and led the team: development tools, game prototypes, the Wobbledink documentation system
Sep 2023 – Aug 2024	**Technical Support Engineer**, IT Novation LLC User support

EDUCATION

2026 – 2029	**ETU “LETI”**, PhD studies 2.3.5 Mathematical support and software of computing systems, complexes and computer networks
2024 – 2026	**RANEPA**, Master's degree 09.04.03 Applied informatics: computer game development (game design)
2020 – 2024	**KubSTU**, Bachelor's degree 10.03.01 Information security

SKILLS

Design and prototyping	Figma, UX audit, Unity, Unreal Engine, Miro
AI-assisted development and scripting	Claude Code, Codex, Gemini, n8n, C#, Blueprints
Design documentation	Google Docs and Sheets, Notion, Confluence, Markdown
Production and collaboration	Git, Jira
Asset creation	Blender, Substance Painter, Adobe Photoshop

PUBLICATIONS AND CERTIFICATES

11 publications (RSCI), 6 software and database registration certificates. Full list: silenceremember.github.io/research.html

LANGUAGES

Russian (native), English (B2)
